

# Identity theft protection and a whole lot more

## Identity Theft Protection

Our proprietary technology monitors<sup>†</sup> for fraudulent use of employees' Social Insurance Number, name, address, and date of birth in applications for credit and services. The patented system sends alerts by text, phone<sup>‡</sup>, email or mobile app when a potential threat is detected.

## Device Security

Multi-layered, advanced security helps protect devices against existing and emerging malware threats, including ransomware, and helps protect private and financial information when employees go online.\*

## Online Privacy

Protect devices on vulnerable connections through bank-grade encryption to keep information private. We also scan common public people-search websites for employees' info and help them opt-out.\*

## Streamlined Member Dashboard

We help safeguard your identity, privacy, and security with our easy-to-use, convenient solution.
